

## RESEARCH NOTE

# Credicorp Flex report: trade-counter inventory

By CM Beyer Research Office - Industry research editor - Updated 11 July 2026

Research reference: a report on keeping essential lines in stock without turning every restock into a fixed loan.

This .org record is kept for citation and due diligence. It records the product or cash-flow question, the public sources checked, and the boundary between research and customer service.

Trade counters lose sales when common lines run out. The first check is whether the cost is dated, evidenced and likely to clear from a known receipt.

Slow-moving stock should not be funded like fast-moving stock. Separate the two before drawing. The links below are the source checks used for this page.

Applications, account servicing and binding customer documents remain on credicorp.co.uk. This page is a source trail, not a sales page.
