

# Credicorp product comparison: Company Authentication Codes risk note

By CM Beyer Research Office - Industry research editor - Updated 11 July 2026

Research reference: a sourced risk note for comparing Credicorp Loan, Credicorp Flex and Credicorp Slice when company authentication codes affects cash flow.

This .org record is kept for citation and due diligence. It records the product or cash-flow question, the public sources checked, and the boundary between research and customer service.

A Companies House authentication code is a practical control point for filing and record changes. Approval is never the point by itself; the useful test is whether the company can repay without creating the next gap.

If access to the filing record is weak, fix that access before adding finance pressure. The external links keep the page anchored to public material rather than sales copy.

Applications, account servicing and binding customer documents remain on credicorp.co.uk. This page is a source trail, not a sales page.
